

# Central Peru 24 sep - 12 oct 2006

Lomas de Lachay, Central Highway, Lake Junín,  
Oxapampa, Satipo road, Ticlio and Santa Eulalia

*Spectacular scenery and birding on Satipo road*

**Report by Roger Ahlman**

# General

This trip was organized by Kolibri Expeditions. The weather was generally good but snow at Junín and some rain in the mountains was disturbing on a few occasions.

The waterlevel in lake Junín had gone down a lot the last weeks before the trip and it was not possible to get out by boat and the lake is very shallow so it wasn't possible to see the Grebe from the shore either. A major dip! On the east slope subtropics we encountered many signs of breeding including several recently fledged birds as well as adults carrying food. Thus the bird activity was rather slow and we didn't encounter many big flocks and song activity was rather poor as well. Despite this we recorded 532 species including five that are still to be described.

Leader - Roger Ahlman

Co-leader - Alex Duran (part of the trip)

Participants - Leif Gabrielsen and Morten Nilsen, Norway  
Ron Berkhout, Holland

Driver - Adriano

Chef - Renzo

# Itinerary

**24 sep** - We all arrived late last night and left Lima at 6 am for Lomas de Lachay. As usual it was foggy up here but we soon found Least Seed-Snipe and Coastal Miners along the entrance track as well as a pair of Peruvian Thick-knees. Breakfast at the visitor centre and then we did a walk along the trails that produced the endemic Thick-billed Miner and also Band-tailed Sierra-Finch and Black-lored Yellowthroat. Then off to the dry side. Near the big roundabout we spotted Tawny-throated Dotterels and surprisingly one bird had two downy chicks so they obviously breed here! In the dry valley we scrambled up the slopes flushing a pair of Band-winged Nightjars and soon found some Cactus Canasteros. Happy with this we returned to Lima and the suburb Ventanilla for some wetland and coastal birding. The usual selection was available but a female Purple Martin was a bit of a surprise. After some business in Lima we sat off for a long night in the van to Huanuco...

**25 sep** - We arrived at the Carpish tunnel at 6 am and started birding directly. Chestnut- and Bay Antpittas were calling and we saw a few other birds before breakfast. A longer walk gave us Barred Fruiteater, Unstreaked Tit-Tyrant and a family of Powerful Woodpeckers among other things, before the rain started. We waited a while before heading down the mountain to Tingo Maria. En route we picked up a pair of Fasciated Tiger-Herons in the river. A lunch break just before Tingo gave six Blue-headed Macaws. We spent the afternoon near the Oilbird cave, which was productive. Some highlights include Huallaga Tanager, Golden-collared Toucanet, a family of Double-toothed Kite and Lafresnaye's Piculet. At dusk we took position at the cave to see several hundreds of Oilbirds flying out. Night at the nice Villa Jennifer just outside of Tingo Maria.

**26 sep** - We started to bird around the lodge before breakfast but it was rather slow with Limpkin and Orange-backed Troupial being highlights. After breakfast we went to the Santa Rosa bridge but it was already starting to get hot and the surroundings were not very nice. Some 10 Hoatzins were easily seen here. After some shopping we headed up the mountain again to the famous Paty trail where we installed ourselves in an empty house. We headed down the trail but hadn't gone far before Leif realized that his binoculars were not around his neck! Had he forgot them in the van or outside? He went up but the car was gone and no bins! Afternoon birding was rather slow but we had good views of White-eared Solitaire, Peruvian Tyrannulet, and a pair of Uniform Antshrikes among others. Back at the road the car was back with Reyes Rivera, who was to help us at Bosque Unchog. To Leif's relief his bins were in the van.

**27 sep** - We went down Paty trail again and activity was better with many highlights such as Gray-breasted Mountain-Toucans, 3 Masked Fruiteaters, Bar-bellied Woodpeckers, Buff-browed Foliage-gleaner and Emerald-bellied Pufflegs to mention a few.

After lunch we drove to Bosque Unchog and on the way up we had good views of a Curve-billed Tinamou. While Adriano and Reyes sat up the camp, the group went for a recce. Not too many things but Coppery Metaltail and Red-rumped Bush-Tyrant went onto the list.

**28 sep** - Today we started walking at 6 am and hit a flock along the steep trail into the main valley. Pardusco and other tanagers were in the flock. I played Yungas Pygmy-Owl to distract the birds and soon the rare Rufous-browed Hemispingus came in. We spread out in the valley to look for the Golden-backed Mountain-Tanager and did that until Reyes came back with a late lunch and then it started to rain so we went back to the camp. We saw all of the other birds here including gripping views of Bay-vented Cotingas but the tanager failed to show.

**29 sep** - Another try for the Golden-back. The Hemispingus showed again on the way down. Despite good weather and five people searching we had to leave without the Golden-backed Mountain-Tanager. Highly disappointing! On the way down on the try slope we found a pair of the endemic Brown-flanked Tanager as a consolidation before continuing to Huanuco and a welcome shower after three days camping.

**30 sep** - We left Huanuco at 6 am and drove for about an hour before stopping at a stake-out for Rufous-backed Inca-Finch. It didn't take long before we had that one bagged. Another hour in the van took us to La Quinua, which is surrounded by very nice dry polylepis forest. A couple of hours here gave Thick-billed Siskins, Striated Earthcreepers, Baron's Spinetail and confiding Streak-headed Antpittas. After lunch we headed up to lake Junín and tried for the Grebe from the shore but it was a bad heat-haze so we went to the other side and arranged with a boat for tomorrow. On the way back to Junín it started to snow!

**1 oct** - Back to Ondores where we had breakfast and the boatmen were waiting. The Norwegians didn't want to go out with the boat so they spent the morning birding along the road and taking pictures. Ron and I walked out towards the lake with two locals. As we came closer to the lake it got muddier and the boat was in the mud as well. We pushed the boat for about half an hour before we realized that this didn't work, the water level was simply too low. A disappointing walk back to Ondores and we picked up the Norwegians and went to the other side to give it a last try but no joy. Instead we started a long drive down the mountains to Villa Rica where we spent the night.

**2 oct** - We left early for the relatively new road to Oxapampa. Near the pass we stopped for breakfast and one of the first birds we saw was a Chestnut-crested Cotinga! Also a pair of Vermillion Tanagers and Long-tailed Antbird were seen before breakfast. We had just finished breakfast when a heavy rain put a halt to birding for about an hour. We walked down the mountain on the far side of the pass picking up more Cotingas, Blue-banded Toucanets, breeding Maroon-chested Chat-Tyrants and Green-fronted Lancebill. Lunch in Oxapampa then to the local cheese factory for stocking up on good cheese. In the early afternoon we headed up towards the Antenna road but there was a strange sound from the car and Adriano was not happy with that so we turned back to Oxapampa and had it checked - and that was lucky! Something underneath the car was completely worn out and had to be changed. Not good for the plan but I hired a taxi to take us up to the pass again for some afternoon birding and we stayed there until after dark trying for Owls and Cloud-forest Screech-Owl in particular but it was quiet despite a nice evening. Night in Oxapampa.

**3 oct** - An early start for the Antenna road which took an hour and a half. It was very quiet up here except for Scaly-naped Amazons. I trolled with the tape for the Antpitta (Rufous or Chestnut?) that lives here. After a while one started to call, this one is certainly a separate species. We walked a little bit more and taped out a Trilling Tapaculo but soon gave up as no action was going on here. At the bottom of the road Alex was waiting and he joined us for the rest of the trip.

The road to Pozuzo cuts through the lower parts of the Yanachaga-Chemillen NP and we walked a large part of this road. Highlights here included Amazonian Umbrellabirds, Wedge-billed Hummingbird and Black-throated Toucanet. Before dusk we stopped near Pozuzo to try for overflying Blue-headed Macaws and we saw 4. In the river were Sunbittern and Fasciated Tiger-Herons.

**4 oct** - An early start for the Cock-of-the-Rock lek nearby. Good action with at least twelve males displaying. In the garden of the property were a Peruvian Tyrannulet and a Sapphire-spangled Emerald. I was given a home-made cigar, which was good. Back towards Oxapampa but with more time in the national park. Birding was rather slow but we picked up three more Umbrellabirds, 3 Black-streaked Puffbirds and a very cooperative Lanceolated Monklet. Gray-mantled Wren and Ocellated Piculet were other goodies here. More problems with the car, this time it was the starting engine that didn't work so we had to push the car to start it. Adriano took care of this in Oxapampa. Another night in Oxapampa.

**5 oct** - Once again back on the road to Villa Rica and we stopped for birding/breakfast at the same place as last time. This time some saw Bay Antpitta and all of us saw Red-ruffed Fruitcrow and Red-crowned Parakeet. As we had a lot of ground to cover today we couldn't spend as much time as we wanted on each site. Down in Villa Rica we went to the nice lake/marsh called Oconal. Soon we picked up a Blackish Rail and some Herons and many Least Grebes. An Olivaceous Greenlet was elusive but was eventually tracked down. Then towards Yurinaki with

stops along the way that produced Pearly-vented Tody-Tyrant, Cabanis' Spinetail and Forest Elaenia among others. Down at Yurinaki by the Río Perené we had lunch and birding by the river. Leif scored the price-bird here - a White-rumped Swallow probably migrating south. At the river it was very hot but we saw Barred Antshrikes, Purple-throated Euphonias and Little Ground-Tyrant. Towards Satipo there was supposed to be a site for Lyre-tailed Nightjars and we stopped there for some afternoon birding while waiting. Ron had some unbelievable luck here; an Andean Laniisoma was sitting in a lone tree before flying off over the river! We hardly believed him but soon found a Striolated Puffbird and both Rufous-bellied- and White-lored Euphonias in some other trees! Strange! No Nightjars showed up so we went to Satipo only to find out that this was the Anniversary Day of the town and the party was in full swing - just outside our hotel! After dinner it started to rain heavily and it got silent to our relief.

**6 oct** - We drove about an hour up the Satipo road to Mariposa where we had breakfast and took shelter from the rain. Adriano went back to Satipo to fix the car properly. When the rain eased we started walking up the road in rather poor habitat and activity was rather slow as well. Later we came across a decent flock that had Blue-browed- and Golden-eared Tanagers among other while an adult Black-and-chestnut Eagle flew over. The car came back in the afternoon and we went up to Apaya village at 2200 m and found an empty house to camp in. In the evening we heard a couple of Lyre-tailed Nightjars nearby.

**7 oct** - Today was to be a rather exciting day despite some rain. We drove straight up to the Carrizales bridge area and soon found Fire-throated Metaltail and a diverse flock. We tried hard to find the recently re-discovered Eye-ringed Thistletail but only heard one up the slope. After breakfast we continued our search and eventually found a nest-building pair that gave good views. Sadly the bamboo habitat here is being destroyed for growing potatoes. We continued on the road to Andamarca and stopped at a stake-out for the undescribed Millpo Tapaculo. The weather was not what we wanted at 4000 m but with the tape one responded and we scrambled up the slope and got good views of it. Two Andean Ibises were in the marsh below. Then off to the next stop some kilometers away. Immediately we saw a nest of the undescribed Thornbird here but no birds. I played the tape of the undescribed 'Mantaro' Wren and they responded. We went there to search for them but were held up by a flock. Ron and I scrambled up the brushy slope and caught up with them and soon saw the Thornbird and the recently described Black-spectacled Brush-Finch and also Creamy-crested Spinetail. Nice! After lunch it stopped raining so we went up there again and had very good looks at the Brush-Finch but the activity was rather poor in the sunshine. Later we drove down to Pucacocha and checked in at the school. An Aplomado Falcon flew by and perched nearby. At dusk the 'Apurimac' Screech-Owls started calling nearby and we tracked down one with the flashlights. The result for today was 4 undescribed (sub)species, one recently described and one recently re-discovered - not bad!

**8 oct** - We woke up to the sound of the Screech-Owls and packed up and took another route back to the Satipo road. The breakfast break above the village didn't produce anything special so we continued until I heard the new Wren singing near the road so we stopped and taped them out. We continued across the puna to the Satipo side of the pass where some impressive bamboo took over and started birding there. Leif got a view of the *obscura* race (or species) of the Rufous Antpitta. Several Unstreaked Tit-Tyrants were seen before we caught up with a flock that had the very recently discovered new 'Light-crowned Spinetail' that Gunnar has recently found here. Almost certainly a new species! We taped out a Large-footed Tapaculo, they sound very different here from at Bosque Unchog and a split is very likely. Good birding down to Apaya along this new road. In the evening we tried a new site for Lyre-tailed Nightjar that looked good. At dusk a male called and two females were flying around and a male put in a short appearance. Night in Apaya village.

**9 oct** - We started birding a bit lower down from Apaya and walked the road downhill. Rather slow birding and annoying with the rushing river next to the road. We had some flocks but not much new until we found two Inca Flycatchers. Then came the rain. We waited a while then drove down to Mariposa and had lunch and waited for the rain to stop, which it did around three in the afternoon. The walk down from the village produced quite a few birds in the late afternoon, among them a male Umbrellabird, Bluish-fronted Jacamars and Black-faced Tanager to mention a few. Night in Satipo.

**10 oct** - We started at the rice-fields just out of Satipo and were greeted by two Pearl Kites while Rufous-sided Crakes were calling and we had brief views of two. Lineated Woodpecker and calling Tataupa Tinamous were also new for the trip list. After breakfast Leif took pictures of a Black-billed Seed-Finch. We did some playback and a male and two females came in. We had a long drive ahead of us so we sat of and made some stops along the river Perené that gave Yellow-billed Tern, Pied Lapwings and Fasciated Tiger-Heron. After lunch in San Ramon we tried the road to Pampa Hermosa but with full sunshine and heat in the midday it was bound to be slow - and it was. We did pick up Coraya Wren and Streak-chested Antwrens before heading for La Oroya where we spent the night.

**11 oct** - From La Oroya it is about an hour to the Ticlio bog at 4500 m. Before getting out of the car we saw the endangered White-bellied Cinclodes. A short walk here gave 7 in total and also the much-wanted Diademed Sandpiper-Plover. Also both Rufous-bellied- and Gray-breasted Seedsnipes and four species of Ground-Tyrants. After breakfast we went to the Milloc bog and had three more DSP as well as both Slender-billed- and Dark-winged Miners. After a while an Olivaceous Thornbill put in a nice show when it literally jumped on the ground from flower to flower. Gunnar showed up and took Leif and Morten down to the airport while Ron and I continued to the *polylepis* in the upper Santa Eulalia valley.

Coming here in the afternoon is not ideal but we did see Canyon Canastero, Black Metaltail and Striated Earthcreeper among others but no White-cheeked Cotinga. Sadly we found several trees recently cut down. On the way down we passed no less than seven donkeys loaded with *polylepis* wood. If this continues the forest here will soon be too degraded to hold the good birds tied to the unique *polylepis*.

Lower down in the valley we found two Spot-winged Pigeons and a Great Inca-Finch. Night in Santa Eulalia village.

**12 oct** - We left at 5 am and drove straight up to the San Pedro de Casta area. We soon saw some Andean Tinamous walking away from us. Rusty-bellied Brush-Finch and Mourning Sierra-Finches were very common. After breakfast we went up the slope and tried for Rufous-breasted Warbling-Finch for which this site has been a good stake-out but no luck. In fact it hasn't been seen here this year! A water-hole up the slope had hundreds of Eared Doves and Black-winged Ground-Doves and a flock of Greenish Yellow-Finches. A brief view of a Bronze-tailed Comet and Ron also saw a Black-necked Woodpecker. It felt slow so we moved down a bit trying to get better views of the Comet but instead got good views of Peruvian Sheartails. It was getting hot and birding was slow. After a late lunch in Huinco we just made a few more unproductive stops before calling it an end to the trip and went back to Lima.

*Breakfast in the Andamarca valley. Spectacular view and no less than three undescribed taxa and one recently described in this valley!*

*Renzo is setting up the breakfast for us while we could concentrate on birding.*

# List of species

**Little Tinamou** *Crypturellus soui*

Singles heard at the Oilbird cave

**Brown Tinamou** *Crypturellus obsoletus*

2-3 heard along the Paty trail, up to 10 heard in the Yanachaga-Chemillen NP

**Undulated Tinamou** *Crypturellus undulatus*

Singles heard at the Oilbird cave

**Tataupa Tinamou** *Crypturellus tataupa*

5 heard at the ricefields near Satipo

**Andean Tinamou** *Nothoprocta pentlandii*

7 seen in the Santa Eulalia valley

**Curve-billed Tinamou** *Nothoprocta curvirostris*

1 seen on the way up to Bosque Unchog and one on the way down.

**Least Grebe** *Tachybaptus dominicus*

About 50 in laguna Oconal, Villa Rica

**Pied-billed Grebe** *Podilymbus podiceps*

1 seen at Pantanos de Ventanilla

**White-tufted Grebe** *Rollandia rolland*

2 seen at Pantanos de Ventanilla and 10 at lake Junín

**Silvery Grebe** *Podiceps occipitalis*

4-5 seen at lake Junín, 10 seen in the upper Santa Eulalia valley

**Peruvian Booby** *Sula variegata*

Many seen at Pantanos de Ventanilla

**Neotropic Cormorant** *Phalacrocorax brasilianus*

Common at Pantanos de Ventanilla, fairly common in Río Perené

**Guanay Shag** *Phalacrocorax bougainvillii*

1 seen at Pantanos de Ventanilla

**Cocoi Heron** *Ardea cocoi*

5 seen at laguna Oconal, Villa Rica

**Great Egret** *Ardea alba*

4 seen at laguna Oconal, Villa Rica

**Snowy Egret** *Egretta thula*

2 seen at Pantanos de Ventanilla, 3 seen near Tingo Maria, 5 seen in Río Perené

**Little Blue Heron** *Egretta caerulea*

2 seen at Pantanos de Ventanilla, 1 seen in Río Perené

**Cattle Egret** *Bubulcus ibis*

Common along the coast and around Tingo Maria

**Striated Heron** *Butorides striatus*

1 seen at the Oilbird cave, 10 seen at laguna Oconal, Villa Rica and 1 seen in Río Perené

**Black-crowned Night-Heron** *Nycticorax nycticorax*

1 seen at lake Junín, 20 seen at laguna Oconal, Villa Rica

**Fasciated Tiger-Heron** *Tigrisoma fasciatum*

2 seen before Tingo Maria, 2+1 seen near Pozuzo, 2+1 seen in Río Perené, 1 seen near Satipo

**Andean Ibis** *Theristicus branickii*

2 seen on the road to Andamarca, 2 seen at Ticlio

**Puna Ibis** *Plegadis ridgwayi*

2 seen at Pantanos de Ventanilla, Common around lake Junín, 1 seen at laguna Oconal, Villa Rica, about 100 between La Oroya and Ticlio, 3 seen at Ticlio

**Chilean Flamingo** *Phoenicopterus chilensis*

About 20 seen in lake Junín

**Andean Goose** *Chloephaga melanoptera*

Common around lake Junín, 20 between Apaya and Andamarca, 10 at Ticlio/Millocc

**Torrent Duck** *Merganetta armata*

2 seen between Huanuco and La Quinoa, 3-4 seen on Satipo road

*Least Grebe, common at laguna Oconal in the outskirts of Villa Rica*

*Fasciated Tiger-Herons in the river near Tingo Maria. We were lucky with this species on this trip with several sightings*

**Yellow-billed Teal** *Anas flavirostris*

2 seen at Bosque Unchog, common at lake Junín

**Crested Duck** *Anas specularioides*

10 seen at lake Junín

**Yellow-billed Pintail** *Anas georgica*

25 seen at lake Junín, 6 seen between Apaya and Andamarca

**White-cheeked Pintail** *Anas bahamensis*

25 seen at Pantanos de Ventanilla

**Puna Teal** *Anas puna*

50 seen at lake Junín

**Cinnamon Teal** *Anas cyanoptera*

Common at Pantanos de Ventanilla

**Andean Duck** *Oxyura ferruginea*

10 seen at Pantanos de Ventanilla, common at lake Junín

**Black Vulture** *Coragyps atratus*

Common in the lowlands

**Turkey Vulture** *Cathartes aura*

Common in the lowlands with singles up in the subtropics

**Andean Condor** *Vultur gryphus*

2 ad+1 juv seen at Ticlio, 1 ad seen in the upper Santa Eulalia valley

**Swallow-tailed Kite** *Elanoides forficatus*

1 seen at the Paty trail, 1 seen near Pozuzo, 5 seen between Ozapampa and Villa Rica, 1 seen on the Satipo road

**Pearl Kite** *Gampsonyx swainsonii*

2 imm seen near Satipo

**Double-toothed Kite** *Harpagus bidentatus*

1 ad with 2 juv seen at the Oilbird cave

**Plumbeous Kite** *Ictinia plumbea*

Singles seen in lowlands/foothills

**Cinereous Harrier** *Circus cinereus*

1 female seen near Junín

**Plain-breasted Hawk** *Accipiter ventralis*

1 ad seen on the Satipo road

**Black-chested Buzzard-Eagle**

*Geranoaetus melanoleucus*

1 imm seen at Lomas de Lachay and 1 ad seen in the Santa Eulalia valley

**Roadside Hawk** *Buteo magnirostris*

Singles seen most days except in the highlands

**Short-tailed Hawk** *Buteo brachyurus*

2 seen in the Yanachaga-Chemilleen NP, 1 seen between Villa Rica and Yurinaki

**Puna Hawk** *Buteo poecilochrous*

About 5 seen in the Junín area, 2 seen in the upper Santa Eulalia valley

**Black-and-chestnut Eagle** *Oroaetus isidori*

1 ad seen on the Satipo road

**Mountain Caracara** *Phalcoboenus megalopterus*

Singles seen in the puna zone with about 20 near lake Junín

**Yellow-headed Caracara** *Milvago chimachima*

1 seen at Río Perené

**American Kestrel** *Falco sparverius*

2 seen at Lomas de Lachay, 1 seen at lake Junín and 2 seen in the Santa Eulalia valley

**Apomado Falcon** *Falco femoralis*

1 seen at Pucacocha and 1 seen between Pucacocha and Satipo road

**Speckled Chachalaca** *Ortalis guttata*

Fairly common in the lowlands and foothills in the east

**Hoatzin** *Opisthocomus hoazin*

10 seen at Santa Rosa bridge, Tingo Maria and 2 seen at Pozuzo

**Limpkin** *Aramus guarauna*

2 seen at Villa Jennifer, Tingo Maria

**Russet-crowned Crane** *Anurolimnas viridis*

3-4 heard at the ricefield near Satipo

**Rufous-sided Crane** *Laterallus melanophaius*

5 heard at laguna Oconal, Villa Rica, 2 seen and a few more heard at the ricefields near Satipo

**Blackish Rail** *Pardirallus nigricans*

1 seen at laguna Oconal, Villa Rica, 1 heard at the ricefields near Satipo

**Plumbeous Rail** *Pardirallus sanguinolentus*

2 seen and 1 heard at lake Junín

**Purple Gallinule** *Porphyryla martinica*

3 seen at laguna Oconal, Villa Rica

**Common Moorhen** *Gallinula chloropus*

Common at Pantanos de Ventanilla, lake Junín and at laguna Oconal, Villa Rica

**Andean (Slate-colored) Coot** *Fulica ardesiaca*

Common at Pantanos de Ventanilla and lake Junín

**Giant Coot** *Fulica gigantea*

8 seen at lake Junín and 3 at Ticlio bog

**Sunbittern** *Eurypyga helias*

1-2 seen at Pozuzo

**American Oystercatcher** *Haematopus palliatus*

4 seen at Pantanos de Ventanilla

**Black-necked Stilt** *Himantopus mexicanus*

10 at Pantanos de Ventanilla

**Peruvian Thick-knee** *Burhinus superciliaris*

2+1 seen at Lomas de Lachay

**Pied Lapwing** *Vanellus cayanus*

10 seen in the Río Perené

*Two immature Pearl Kites at the Satipo ricefields*

**Andean Lapwing** *Vanellus resplendens*

4 seen at Bosque Unchog, common around lake Junín and 2 at Milloc

**Killdeer** *Charadrius vociferus*

1 seen at Lomas de Lachay and 4 at Pantanos de Ventanilla

**Puna Plover** *Charadrius alticola*

1+2 seen at lake Junín

**Diademed Sandpiper-Plover** *Phegornis mitchellii*

2 seen at Ticlio and 3 at Milloc bog

**Tawny-throated Dotterel** *Oreopholus ruficollis*

8 seen at Lomas de Lachay including 1 with 2 pull that ran away far from us!

**Puna Snipe** *Gallinago andina*

5 seen at Ticlio bog

**Whimbrel** *Numenius phaeopus*

10 seen at Pantanos de Ventanilla

**Greater Yellowlegs** *Tringa melanoleuca*

Singles seen at lake Junín

**Lesser Yellowlegs** *Tringa flavipes*

5 seen at Pantanos de Ventanilla and singles at lake Junín. Many unidentified Yellowlegs at Junín.

**Spotted Sandpiper** *Actitis macularia*

Singles seen at Pantanos de Ventanilla and in rivers in the east

**Sanderling** *Calidris alba*

300 seen at Pantanos de Ventanilla

**Baird's Sandpiper** *Calidris bairdii*

Common around lake Junín

**Wilson's Phalarope** *Phalaropus wilsoni*

50 seen at Pantanos de Ventanilla, hundreds (or thousands) at lake Junín

**Rufous-bellied Seedsnipe** *Attagis gayi*

2 seen at Ticlio bog

**Gray-breasted Seedsnipe** *Thinocorus orbignyianus*

14 seen at Ticlio and 1 at Milloc bog

**Least Seedsnipe** *Thinocorus rumicivorus*

20 at Lomas de Lachay

**Band-tailed Gull** *Larus belcheri*

Common along the coast at Pantanos de Ventanilla

**Gray Gull** *Larus modestus*

Common along the coast at Pantanos de Ventanilla

**Kelp Gull** *Larus dominicanus*

Singles along the coast at Pantanos de Ventanilla

**Gray-headed Gull** *Larus cirrocephalus*

Common at Pantanos de Ventanilla

**Andean Gull** *Larus serranus*

Common at lake Junín, 5 between Apaya and Andamarca and 2 at Ticlio

**Yellow-billed Tern** *Sterna superciliaris*

1 seen at Río Perené

**Inca Tern** *Larosterna inca*

Singles along the coast at Pantanos de Ventanilla

**Rock Pigeon** *Columba livia*

Seen in most cities and villages

**Spot-winged Pigeon** *Columba maculosa*

2+2 seen in the Santa Eulalia valley

**Band-tailed Pigeon** *Columba fasciata*

Fairly common in the subtropic and temperate zones

**Plumbeous Pigeon** *Columba plumbea*

1 heard at Pozuzo and Villa Rica and 1 seen on Satipo road

**Eared Dove** *Zenaida auriculata*

Common along the coast, at lake Junin and in the Santa Eulalia valley

**West Peruvian Dove** *Zenaida meloda*

Common along the coast

**Ruddy Ground-Dove** *Columbina talpacoti*

Singles seen in secondary habitat in the lowlands at Tingo Maria, Pozuzo and Satipo

**Croaking Ground-Dove** *Columbina cruziana*

Common along the coast

**Bare-faced Ground-Dove** *Metriopelia ceciliae*

Common in the Santa Eulalia valley

**Black-winged Ground-Dove** *Metriopelia melanoptera*

Common in the Santa Eulalia valley with at least 150 at a water-hole

**White-tipped Dove** *Leptotila verreauxi*

Singles in the lowlands and foothills, also in the Santa Eulalia valley

**Gray-fronted Dove** *Leptotila rufaxilla*

5 seen and heard around Tingo Maria

**Ruddy Quail-Dove** *Geotrygon montana*

1 seen in the Yanachaga-Chemillen NP

**Chestnut-fronted Macaw** *Ara severa*

3 seen at the Oilbird cave

**Blue-headed Macaw** *Propyrrhura couloni*

6 seen near Tingo Maria and 4 seen near Pozuzo

**White-eyed Parakeet** *Aratinga leucophthalmus*

Common at the Oilbird cave and around Villa Jennifer, 5 seen in the Yanachaga-Chemillen NP, 10 seen between Villa Rica and Satipo and 1 seen near San Ramon

**[Golden-plumed Parakeet** *Leptosittaca branickii*]

3 possible seen very briefly on the road between Villa Rica and Oxapampa

**Red-crowned Parakeet** *Pyrrhura roseifrons*

5 seen near the pass on the road between Villa Rica and Oxapampa

**Pacific Parrotlet** *Forpus coelestis*

Fairly common along the coast

**Blue-headed Parrot** *Pionus menstruus*

Singles to fairly common in the lowlands and foothills

**Plum-crowned Parrot** *Pionus tumultuosus*

5 seen at Bosque Unchog, 2 seen between Villa Rica and Oxapampa, 2+1 seen near Apaya on the Satipo road

**Scaly-naped Parrot** *Amazona mercenaria*

1 seen at the Carpath tunnel, 90 seen on the road between Villa Rica and Oxapampa, common on the Antenna road, Oxapampa, 100 near Mariposa on the Satipo road

**Mealy Parrot** *Amazona farinosa*

1 seen on the Satipo ricefields

**Squirrel Cuckoo** *Piaya cayana*

Singles seen on 8 days in the foothills and subtropics

**Smooth-billed Ani** *Crotophaga ani*

Common in the lowlands in the east

**Groove-billed Ani** *Crotophaga sulcirostris*

Common along the coast

**Striped Cuckoo** *Tapera naevia*

1 seen at Santa Rosa bridge, 1 heard between Yurinaki and Satipo and 1 heard at the ricefields near Satipo

**[Barn Owl** *Tyto alba*]

1 found freshly dead 8 kms north of Junín at 4100 m

**Tropical Screech-Owl** *Megascops choliba*

1 heard in the garden at Villa Jennifer

**Apurimac Screech-Owl** *Megascops sp nov?*

1 seen and 1 heard at Pucacocha

*Sounds very similar to Koepcke's Screech-Owl Megascops koepckeae and they are close in range as well, occupies the same habitat (eucalyptus groves). Might be conspecific.*

**[Rufous-banded Owl** *Ciccaba albitarsis*]

1 owl heard near the pass between Villa Rica and Oxapampa that could possibly have been this species

**Peruvian Pygmy-Owl** *Glaucidium peruanum*

3 seen in the Santa Eulalia valley

**Burrowing Owl** *Athene cunicularia*

2 seen at Lomas de Lachay and 1 seen at lake Junín

**Oilbird** *Steatornis caripensis*

At least 300 at the Oilbird cave

**Common Potoo** *Nyctibius griseus*

1 seen between Yurinaki and Satipo

**Pauraque** *Nyctidromus albicollis*

1 seen at Pozuzo, 5 seen near Satipo

**Band-winged Nightjar** *Caprimulgus longirostris decussatus*

2 seen at Lomas de Lachay

*These were of the coastal race*

**Swallow-tailed Nightjar** *Uropsalis segmentata*

1 female seen between Oxapampa and Villa Rica

**Lyre-tailed Nightjar** *Uropsalis lyra*

2-3 males heard at Apaya, 1 male and 2 females seen below Apaya

**Chestnut-collared Swift** *Streptoprocne rutila*

Common in the eastern lowlands

**White-collared Swift** *Streptoprocne zonaris*

Common at Pozuzo and Satipo road

**Andean Swift** *Aeronautes andecolus*

Common between Huanuco and Junín and between Junín and San Ramon and in the Santa Eulalia valley

**Fork-tailed Palm-Swift** *Tachornis squamata*

Common around Tingo Maria

**Green Hermit** *Phaethornis guy*

3 seen at Yanachaga-Chemillén NP, 1 seen at Pozuzo

**Reddish Hermit** *Phaethornis ruber*

1 seen near Mariposa on Satipo road

**Green-fronted Lancebill** *Doryfera ludovicæ*

1 seen between Villa Rica and Oxapampa probably attending a nest. 2 seen on the Antenna road, Oxapampa,

2 seen near Mariposa, Satipo road

**Gray-breasted Sabrewing** *Campylopterus largipennis*

1 seen at Villa Jennifer, Tingo Maria

**Green Violetear** *Colibri thalassinus*

2 seen near Oxapampa

**Sparkling Violetear** *Colibri coruscans*

2 seen near Oxapampa, 10 seen near Mariposa, Satipo road, 5 seen near Pucococha

**Violet-headed Hummingbird** *Klais guimeti*

2 seen in the Yanachaga-Chemillén NP

**Wire-crested Thorntail** *Popelairia popelairii*

1 female seen near Oxapampa

**Blue-tailed Emerald** *Chlorostilbon mellisugus*

1 female seen near San Ramon

**Fork-tailed Woodnymph** *Thalurania furcata*

Singles seen in the Yanachaga-Chemillén/Pozuzo area

**White-bellied Hummingbird** *Leucippus chionogaster*

2 seen near Pozuzo and 1 seen near Andamarca

**Sapphire-spangled Emerald** *Polyerata lactea*

1 seen at Pozuzo, 2 seen in the Yanachaga-Chemillén NP, 1 seen near Satipo

**Glittering-throated Emerald** *Polyerata fimbriata*

5 seen in one tree between Yurinaki and Villa Rica, 2 seen at Pozuzo, 1 seen at Yurinaki, 1 seen at Satipo rice-fields

**Speckled Hummingbird** *Adelomyia melanogenys*

Singles most days in the subtropics

**Chestnut-breasted Coronet** *Boissonneaua matthewsii*

1 seen on the Satipo road

**Shining Sunbeam** *Aglaeactis cupripennis*

2+4 seen above Apaya

**Black-breasted Hillstar** *Oreotrochilus melanogaster*

Almost 10 seen at lake Junín

**Mountain Velvetbreast** *Lafresnaya lafresnayi*

2 seen at the Carpish tunnel, 1 seen at Paty trail, 1 seen at Pucacocha, 1 seen above Apaya

**Bronzy Inca** *Coeligena coeligena*

1 seen between Oxapampa and Villa Rica

**Collared Inca** *Coeligena torquata*

Fairly common in the subtropics

**Violet-throated Starfrontlet** *Coeligena violifer*

3 seen at Bosque Unchog, 5 seen on the upper Satipo road

**Sword-billed Hummingbird** *Ensifera ensifera*

1 seen on the upper Satipo road

**Giant Hummingbird** *Patagona gigas*

1 seen between Huanuco and La Quinua, 2 seen in the Santa Eulalia valley

**Amethyst-throated Sunangel** *Heliangelus amethysticollis*

Singles seen all days in the upper subtropical and temperate zones

**Emerald-bellied Puffleg** *Eriocnemis alinae*

2 seen on the Paty trail

**Booted Racket-Tail** *Ocreatus underwoodii*

1 female seen in the Yanachaga-Chemillén NP

**Black-tailed Trainbearer** *Lesbia victoriae*

1 seen on the way up to Bosque Unchog

**Green-tailed Trainbearer** *Lesbia nuna*

1 seen above Pucacocha

**Bronze-tailed Comet** *Polyonymus caroli*

1 seen in the Santa Eulalia valley

**Purple-backed Thornbill** *Ramphomicron microrhynchum*

1 male seen on the upper Satipo road

**Tyrian Metaltail** *Metallura tyrianthina*

3 seen at the Carpish tunnel, 1 seen at Bosque Unchog, 5 seen above Pucacocha

**Fire-throated Metaltail** *Metallura eupogon*

3 seen on the upper Satipo road, 1 seen above Pucacocha

**Coppery Metaltail** *Metallura theresiae*

10 seen daily at Bosque Unchog

**Black Metaltail** *Metallura phoebe*

3 seen in the Santa Eulalia valley

**Olivaceous Thornbill** *Chalcostigma olivaceum*

1 seen at the Milloc bog

**Long-tailed Sylph** *Agelaiocercus kingi*

3 seen between Villa Rica and Oxapampa and 2 seen on the Satipo road

**Wedge-billed Hummingbird** *Augastes geoffroyi*

1 singing male in the Yanachaga-Chemillén NP

**Oasis Hummingbird** *Rhodopis vesper*

2 seen in the Santa Eulalia valley

**Peruvian Sheartail** *Thaumastura cora*

1 male and about 5 females seen in the Santa Eulalia valley

**Purple-collared Woodstar** *Myrtis fanny*

3 females seen in the Santa Eulalia valley

**White-bellied Woodstar** *Chaetocercus mulsant*

1 female at the cheese factory in Oxapampa, 3 seen on the Satipo road

**Amazonian White-tailed Trogon** *Trogon viridis*

1 seen and heard at the Oilbird cave

**Amazonian Violaceous Trogon** *Trogon violaceus*

1 seen and heard at the Oilbird cave

**Masked Trogon** *Trogon personatus*

1 seen on the Paty trail

**Crested Quetzal** *Pharomachrus antisianus*

Heard at the Carpisah tunnel and Paty trail

**Golden-headed Quetzal** *Pharomachrus auriceps*

Heard at the Carpisah tunnel and Paty trail, 2+2 seen between Villa Rica and Oxapampa

**Ringed Kingfisher** *Ceryle torquatus*

1 seen near Oxapampa

**Amazon Kingfisher** *Chloroceryle amazona*

1 seen near Oxapampa

**Highland Motmot** *Momotus aequatorialis*

1 seen in the Yanachaga-Chemillen NP, 3+1 seen on the Satipo road

**Bluish-fronted Jacamar** *Galbula cyanescens*

2 seen at the Oilbird cave, 2 seen on the Satipo road, 2 seen near San Ramon

**Striolated Puffbird** *Nystalus striolatus*

1 seen between Yurinaki and Satipo

**Black-streaked Puffbird** *Malacoptila fulvogularis*

3 seen in the Yanachaga-Chemillen NP

**Lanceolated Monklet** *Micromonacha lanceolata*

1 seen in the Yanachaga-Chemillen NP

**Black-fronted Nunbird** *Monasa nigrifrons*

Fairly common at the Oilbird cave and at Villa Jennifer, 1 seen on the Satipo road

**Gilded Barbet** *Capito auratus*

1 seen at the Oilbird cave, 3 seen and 1 heard near Pozuzo

**Versicolored Barbet** *Eubucco versicolor*

11 seen on the Satipo road including a family group

**Black-throated Toucanet** *Aulacorhynchus atrogularis*

1 seen and 1 heard in the Yanachaga-Chemillen NP

**Blue-banded Toucanet** *Aulacorhynchus coeruleicinctis*

2 seen between Villa Rica and Oxapampa

**Chestnut-eared Aracari** *Pteroglossus castanotis*

5 seen at the Oilbird cave, 5 seen at Villa Jennifer, 2 seen at Yurinaki, 1 seen on the Satipo road

**Gray-breasted Mountain-Toucan** *Andigena hypoglauca*

3 seen both days at the trailhead at the Paty trail, 2 seen on the Satipo road

**Golden-collared Toucanet** *Selenidera reinwardtii*

2 seen at the Oilbird cave

**Black-mandibled Toucan** *Ramphastos ambiguus*

3 seen or heard at the Oilbird cave, 1 heard in the Yanachaga-Chemillen NP

**Lafresnaye's Piculet** *Picumnus lafresnayi*

2 seen at the Oilbird cave, 1 seen in Villa Rica, 2 seen on the lower Satipo road

**Ocellated Piculet** *Picumnus dorbygnianus*

2+2 seen in the Yanachaga-Chemillen NP, 4 seen on the Satipo road

**Yellow-tufted Woodpecker** *Melanerpes cruentatus*

3 seen at Villa Jennifer, 5 seen on the Satipo road

**Bar-bellied Woodpecker** *Veniliornis nigriceps*

2 seen on the Paty trail

**Little Woodpecker** *Veniliornis passerinus*

1 seen at the Oilbird cave

**Red-stained Woodpecker** *Veniliornis affinis*

2 seen at the Oilbird cave

**Crimson-mantled Woodpecker** *Piculus rivolii*

1 seen at the Carpisah tunnel, 4 seen at Paty trail, 1 seen on Satipo road

**Black-necked Woodpecker** *Colaptes atricollis*

1 seen in the Santa Eulalia valley

*This Lanceolated Monklet in the Yanachaga-Chemillen NP did its best to satisfy the photographers!*

**Andean Flicker** *Colaptes rupicola*

Fairly common in the puna zone

**Lineated Woodpecker** *Dryocopus lineatus*

1 seen and 1 heard at the Satipo ricefields

**Powerful Woodpecker** *Campephilus pollens*

1 family seen at the Paty trail

**Coastal Miner** *Geositta peruviana*

20 seen at Lomas de Lachay

**Grayish Miner** *Geositta maritima*

2 seen at Lomas de Lachay

**Common Miner** *Geositta cunicularia*

Common around lake Junín, 5 seen at Milloc bog

**Dark-winged Miner** *Geositta saxicolina*

1 seen at lake Junín and 2 seen at Milloc bog

**Thick-billed Miner** *Geositta crassirostris*

2 seen at Lomas de Lachay and 2-3 seen in the Santa Eulalia valley

**Slender-billed Miner** *Geositta tenuirostris*

1-2 seen at the Milloc bog

**Plain-breasted Earthcreeper** *Upucerthia jelskii*

2 seen at lake Junín

**Striated Earthcreeper** *Upucerthia serrana*

3 seen at La Quinoa, 1 seen between Andamarca and Apaya, 2 seen in the upper Santa Eulalia valley

**Bar-winged Cinclodes** *Cinclodes fuscus*

Common in the highlands

**White-winged Cinclodes** *Cinclodes atacamensis*

1 seen at lake Junín and 1 seen in the upper Santa Eulalia valley

**White-bellied Cinclodes** *Cinclodes palliatus*

7 seen at the Ticlio bog

**Rusty-crowned Tit-Spinetail** *Leptasthenura pileata*

2 seen at La Quinoa, 2+2 seen in the Santa Eulalia valley

**Wren-like Rushbird** *Phleocryptes melanops*

5 seen or heard at Pantanos de Ventanilla, heard at lake Junín

**Rufous Spinetail** *Synallaxis unirufa*

Singles seen and heard on the Paty trail and Carpath tunnel

**Azara's Spinetail** *Synallaxis azarae*

Singles seen or heard daily in the Villa Rica-Oxapampa area. 1 seen between Andamarca and Apaya

**Dark-breasted Spinetail** *Synallaxis albigularis*

1 heard near Tingo Maria

**Cabanis' Spinetail** *Synallaxis cabanisi*

2 seen between Villa Rica and Yurinaki, 2 seen on the lower Satipo road

**Southern Plain-crowned Spinetail** *Synallaxis gujanensis*

1+1 heard near Villa Rica, 3 seen at Mariposa, Satipo road, 1 heard at Río Perené

**Creamy-crested Spinetail** *Cranioleuca albicapilla*

6+5 seen in the Andamarca valley

**"Apaya Light-crowned" Spinetail** *Cranioleuca sp nov*

6 seen on the Satipo road above Apaya

*A recently found taxon that is probably a new species as it is far away from the Cranioleuca albiceps and sounds different*

**Baron's Spinetail** *Cranioleuca baroni*

2 seen at LaQuinoa

**Ash-browed Spinetail** *Cranioleuca curtata*

2 seen near Oxapampa

**Plenge's Thistletail** *Schizoeaca peruviana plengei*

3 seen at Bosque Unchog

**Eye-ringed Thistletail** *Schizoeaca palpebralis*

1 heard and 1 nest-building pair on the upper Satipo road

**Canyon Canastero** *Asthenes pudibunda*

5+5 seen in the Santa Eulalia valley

**Cactus Canastero** *Asthenes cactorum*

2-3 seen at Lomas de Lachay

**Streak-throated Canastero** *Asthenes humilis*

1+6 seen between Apaya-Andamarca-Apaya, 10 seen at Ticlio/Milloc

**Junín Canastero** *Asthenes virgata*

Singles at Bosque Unchog

**Line-fronted Canastero** *Asthenes urubambensis*

3 seen at Bosque Unchog

**'Mantaro' Thornbird** *Phacellodomus sp nov*

1 seen and heard above Andamarca and also a nest found

*Another new taxon from the río Mantaro drainage that is probably a new species*

**Rusty-winged Barbtail** *Premnornis guttuligera*

2 seen on the Paty trail

**Spotted Barbtail** *Premnoplex brunnescens*

2 seen on the Paty trail

**Pearled Treerunner** *Margarornis squamiger*

A core member in the flocks in the upper subtropic and temperate zones

**Streaked Xenops** *Xenops rutilans*

1+1 seen on the Satipo road

**Montane Foliage-gleaner** *Anabacerthia striaticollis*

1+1 seen in the Yanachaga-Chemillen NP and 1 between Oxapampa and Villa Rica

**Streaked Tuftedcheek** *Pseudocolaptes boissonneautii*

3+1 seen on the Paty trail, 2 seen at Bosque Unchog 1 between Villa Rica and Oxapampa and 1 on the Satipo road

**Buff-browed Foliage-gleaner** *Syndactyla rufosupercilata*

2 seen on the Paty trail, 1 seen on the Satipo road

**Plain-brown Woodcreeper** *Dendrocincla fuliginosa neglecta*

1 seen at the Oilbird cave

**Wedge-billed Woodcreeper** *Glyphorhynchus spirurus*

1+1 seen in the Yanachaga-Chemillen NP

**Buff-throated Woodcreeper** *Xiphorhynchus guttatus*

1 seen at the Oilbird cave

**Montane Woodcreeper** *Lepidocolaptes lacrymiger*

1 seen on the Paty trail, 3 seen between Villa Rica and Oxapampa, 2 seen on the Satipo road

**Barred Antshrike** *Thamnophilus doliatus*

2 seen at Yurinaki, 5 seen and heard at the Satipo ricefields

**Chestnut-backed Antshrike** *Thamnophilus palliatus*

1 seen near Oxapampa, 1 seen on the Satipo road

**Uniform Antshrike** *Thamnophilus unicolor*

1 pair seen on the Paty trail

**Plain-winged Antshrike** *Thamnophilus schistaceus*

2 heard at the Oilbird cave

**Variable Antshrike** *Thamnophilus caerulescens*

1 male seen at the Oilbird cave, 1 seen on the Paty trail, 1 seen near San Ramon

**Pygmy Antwren** *Myrmotherula brachyura*

1 seen at the Oilbird cave

**Stripe-chested Antwren** *Myrmotherula longicauda*

2 seen near San Ramon

**Dot-winged Antwren** *Microrhopias quixensis*

1 male seen at the Oilbird cave

**Long-tailed Antbird** *Drymophila caudata*

Singles seen and heard on the Paty trail and between Villa Rica and Oxapampa

**Blackish Antbird** *Cercomacra nigrescens*

2 heard between Villa Rica and Oxapampa, 2 seen on the Satipo road

*Belongs to the uplands race notata which is best regarded as a separate species from the lowland fuscicauda*

**White-backed Fire-Eye** *Pyriglena leuconota*

1 heard between Oxapampa and Villa Rica

**White-browed Antbird** *Myrmoborus leucophrys*

1 heard at the Oilbird cave, 2 seen on the Satipo road and 1 heard near San Ramon

**Foothill Warbling Antbird** *Hypocnemis cantator subflava*

2 heard at the Oilbird cave

*The taxonomy is a bit pending regarding the Warbling Antbird....*

**Undulated Antpitta** *Grallaria squamigera*

About 5 heard at Bosque Unchog

**Scaled Antpitta** *Grallaria guatemalensis*

1 heard in the Yanachaga-Chemillen NP

**Stripe-headed Antpitta** *Grallaria andicola*

5 seen at La Quinoa and 1 seen in the upper Santa Eulalia valley

**Bay Antpitta** *Grallaria capitalis*

Heard at the Carpish tunnel, Paty trail, between Oxapampa and Villa Rica and on the Satipo road.

**"Oxapampa" Antpitta** *Grallaria [rufula/blakei] sp nov*

1 heard on the Antenna road

*This form has been "doubtfully" referred to Chestnut Antpitta by Fjeldså&Krabbe and Ridgely&Tudor. By Islers et. al. it is under Rufous Antpitta. The call is completely different from Chestnut Antpitta and from Rufous Antpitta in the neighborhood (see below).*

**"Fulvous" Antpitta** *Grallaria [rufula] obscura*

5 heard at Bosque Unchog, 2 seen briefly on the upper Satipo road

*The Rufous Antpitta complex certainly involves many more than one species.*

**Chestnut Antpitta** *Grallaria blakei*

3-4 heard at the Carpish tunnel and Paty trail

**Trilling Tapaculo** *Scytalopus parvirostris*

Singles heard on the Paty trail and in the Oxapampa area where 1 was seen well.

**Large-footed Tapaculo** *Scytalopus macropus*

2 heard and seen at Bosque Unchog, 2 heard and seen on the Satipo road

*Birds from the two populations sounds very different and may represent different species*

**Rufous-vented Tapaculo** *Scytalopus femoralis*

Singles heard at Paty trail, the Oxapampa area and Satipo road with 1 seen on Paty trail

**Millpo Tapaculo** *Scytalopus sp nov*

1 seen and heard between Satipo road and Andamarca

*Has been "known" for a while but still not described*

**Neblina Tapaculo** *Scytalopus altirostris*

About 5 heard and 1 seen at Bosque Unchog

**Tschudi's Tapaculo** *Scytalopus acutirostris*

About 5 heard and 1 seen at Bosque Unchog and 1 heard between Villa Rica and Oxapampa

**Shrike-like Cotinga** *Laniisoma elegans*

1 seen by Ron in a lone tree between Yurinaki and Satipo

**Red-crested Cotinga** *Ampelion rubrocristata*

3 seen at Bosque Unchog, 2+4 seen on the upper Satipo road

**Chestnut-crested Cotinga** *Ampelion rufaxilla*

2 seen and 2 heard between Villa Rica and Oxapampa

**Bay-vented Cotinga** *Doliornis sclateri*

5 seen, including juveniles, at Bosque Unchog

**Band-tailed Fruiteater** *Pipreola intermedia*

2 seen at Bosque Unchog

**Barred Fruiteater** *Pipreola arcuata*

2 seen at the Carpish tunnel

**Masked Fruiteater** *Pipreola pulchra*

2 males and 1 female seen in one tree on the Paty trail

**Red-ruffed Fruitcrow** *Pyroderus scutatus*

1 seen between Oxapampa and Villa Rica

*Adult Bay-vented Cotinga at Bosque Unchog*

**Amazonian Umbrellabird** *Cephalopterus ornatus*

2+3 seen in the Yanachaga-Chemillén NP, 2+1 seen near Mariposa on the Satipo road

**Andean Cock-of-the-rock** *Rupicola peruviana*

2 seen at the Oilbird cave, 5 seen in the Yanachaga-Chemillén NP, 12 males displaying near Pozuzo and 1 female seen on Satipo road

**Mouse-colored Tyrannulet** *Phaeomyias murina*

1 seen at Villa Jennifer, 2 seen near Pozuzo and 2 seen near Oxapampa

**Yellow-crowned Tyrannulet** *Tyrannulus elatus*

1 heard at Villa Jennifer and 1 seen between Villa Rica and Yurinaki

**Forest Elaenia** *Myiopagis gaimardii*

1 seen and heard between Villa Rica and Yurinaki

**Greenish Elaenia** *Myiopagis viridicata*

2 seen at Yurinaki and 1 between Yurinaki and Satipo, 1 seen in Mariposa on the Satipo road, 1 seen near Río Perené

**Yellow-bellied Elaenia** *Elaenia flavogaster*

2 seen on the Satipo road

**White-crested Elaenia** *Elaenia albiceps*

1 seen at Bosque Unchog

**Mottle-backed Elaenia** *Elaenia gigas*

3 seen near Pozuzo and 1 near Satipo

**Highland Elaenia** *Elaenia obscura*

1 seen at Apaya, Satipo road

**Sierran Elaenia** *Elaenia pallatangae*

1 seen on the Paty trail, 1 seen between Villa Rica and Oxapampa, 3 seen on the Satipo road

**Southern Beardless Tyrannulet** *Camptostoma obsoletum sclateri*

1 seen in the Santa Eulalia valley

**Torrent Tyrannulet** *Serpophaga cinerea*

Singles or pairs seen near streams

**Streak-necked Flycatcher** *Mionectes striaticollis*

Singles in the subtropics

**Olive-striped Flycatcher** *Mionectes olivaceus*

2 seen in the Yanachaga-Chemillén NP

**Inca Flycatcher** *Leptopogon taczanowskii*

2 seen on the Satipo road

**Slaty-capped Flycatcher** *Leptopogon superciliaris*

Singles seen in the Yanachaga-Chemillén NP and on the Satipo road

**Rufous-headed Pygmy-Tyrant** *Pseudotriccus ruficeps*

2 seen at the Carpish tunnel and 1 on Paty trail

**Variegated Bristle-Tyrant** *Pogonotriccus poecilotis*

1 seen on the Paty trail and 2 seen in the Yanachaga-Chemillén NP

**Mottle-cheeked Tyrannulet** *Phylloscartes ventralis*

1 seen between Villa Rica and Oxapampa

**Peruvian Tyrannulet** *Zimmerius viridiflavus*

1 seen at Villa Jennifer, 2 seen at Paty trail, 1 seen near Villa Rica, 2 seen between Villa Rica and Oxapampa, 1 seen in the Yanachaga-Chemillén NP, 1 seen near Oxapampa and 1 seen on the Satipo road

**White-throated Tyrannulet** *Mecocerculus leucophrys*

Common at Bosque Unchog and singles on the upper Satipo road

**White-tailed Tyrannulet** *Mecocerculus poecilocercus*

2+3 on the Paty trail, 4 seen between Oxapampa and Villa Rica and 5 seen near Apaya on the Satipo road

**White-banded Tyrannulet** *Mecocerculus stictopterus*

10 seen at the Carpish tunnel and 3 at Paty trail

**Unstreaked Tit-Tyrant** *Anairetes agraphia*

1 seen at the Carpish tunnel, 3 seen on the Satipo road

*Male Umbrellabird near Mariposa on the Satipo road. Eight seen in total on the trip.*

**Pied-crested Tit-Tyrant** *Anairetes reguloides*

1 seen below Bosque Unchog, 2 seen between Huanuco and La Quinoa, 1 seen in the Santa Eulalia valley

**Yellow-billed Tit-Tyrant** *Anairetes flavirostris*

2 seen between Huanuco and La Quinoa, 4+2 seen in the Santa Eulalia valley

**Tufted Tit-Tyrant** *Anairetes parulus*

10 seen at Bosque Unchog, 5 seen at La Quinoa

**Many-colored Rush-Tyrant** *Tachuris rubrigastra*

1 seen at lake Junín

**Scale-crested Pygmy-Tyrant** *Lophotriccus pileatus*

Fairly common in the Villa Rica-Oxapampa area

**Pearly-vented Tody-Tyrant** *Hemitriccus margaritaceiventer*

2 seen between Villa Rica and Yurinaki

**Common Tody-Flycatcher** *Todirostrum cinereum*

Singles seen in the lowlands and foothills

**Yellow-browed Tody-Flycatcher** *Todirostrum chrysocrotaphum*

1 seen between Villa Rica and Yurinaki

**Olivaceous Flatbill** *Rhynchocyclus olivaceus*

1 seen between Villa Rica and Yurinaki

**Zimmer's Flycatcher** *Tolmomyias assimilis*

1 seen in the Yanachaga-Chemillen NP and 1 seen between Oxapampa and Yurinaki

**Olive-faced Flycatcher** *Tolmomyias viridiceps*

1 seen at the Oilbird cave

**Flavescent Flycatcher** *Myiophobus flavicans*

1 seen on the Paty trail

**Ochraceous-breasted Flycatcher** *Myiophobus ochraceiventris*

Up to 7 seen at Bosque Unchog and 1 seen on the upper Satipo road

**Bran-colored Flycatcher** *Myiophobus fasciatus*

1 seen near Pozuzo

**Cinnamon Flycatcher** *Pyrrhomyias cinnamomea*

Fairly common in the subtropics

**Cliff Flycatcher** *Hirundinea ferruginea*

5 seen at the Oilbird cave and 1 seen between Junín and Villa Rica

**Olive-sided Flycatcher** *Contopus cooperi*

1 seen at Mariposa, Satipo road

**Smoke-colored Pewee** *Contopus fumigatus*

Singles seen in the subtropics

**Tumbes Pewee** *Contopus punensis*

1 seen in the Santa Eulalia valley

**Tropical Pewee** *Contopus cinereus*

1 seen at Río Perené

**Black Phoebe** *Sayornis nigricans*

Singles seen near water

**Vermilion Flycatcher** *Pyrocephalus rubinus*

Common along the coast

**Maroon-chested Chat-Tyrant** *Ochthoeca thoracica*

1 pair at nest between Villa Rica and Oxapampa, 1 seen and 2 heard on Satipo road

**D'Orbigny's Chat-Tyrant** *Ochthoeca oenanthoides*

4 seen in the upper Santa Eulalia valley

**Rufous-breasted Chat-Tyrant** *Ochthoeca rufipectoralis*

1 seen at the Carpish tunnel, 3+4 seen at Bosque Unchog and 10 seen between Apaya and Andamarca

**Brown-backed Chat-Tyrant** *Ochthoeca fuscicolor*

Fairly common at Bosque Unchog, 1 seen on the upper Satipo road

**White-browed Chat-Tyrant** *Ochthoeca leucophrys*

2 seen below Bosque Unchog, 1 seen between Huanuco and La Quinoa, 2+2 seen in the Santa Eulalia valley

**Red-rumped Bush-Tyrant** *Cnemarchus erythropygius*

2 seen at Bosque Unchog

**Streak-throated Bush-Tyrant** *Myiotheretes striaticollis*

1 seen at the Carpath tunnel, 2 seen at Apaya, Satipo road and 3 in the Santa Eulalia valley

**Black-billed Shrike-Tyrant** *Agriornis montana*

8 seen at lake Junín

**Little Ground-Tyrant** *Muscisaxicola fluviatilis*

1 seen at Yurinaki and 1 along Río Perené

**Puna Ground-Tyrant** *Muscisaxicola juninensis*

1 seen at Ticlio bog

**Taczanowski's Ground-Tyrant** *Muscisaxicola griseus*

1 seen at Ticlio bog

**Cinereous Ground-Tyrant** *Muscisaxicola cinereus*

2 seen at Ticlio bog

Also many unidentified small Ground-Tyrants

**White-fronted Ground-Tyrant** *Muscisaxicola albifrons*

10 seen at Ticlio bog and 5 at Milloc bog

**Short-tailed Field-Tyrant** *Muscigralla brevicauda*

2 seen at Lomas de Lachay

**Andean Negrito** *Lessonia oreas*

Fairly common around lake Junín

**Rufous-tailed Tyrant** *Knipolegus poecilurus*

2 seen in the Yanachaga-Chemillen NP, 2 seen between Oxapampa and Villa Rica, 5 seen between Andamarca and Apaya

**White-winged Black-Tyrant** *Knipolegus aterrimus*

3 seen near Pucacocha

**Long-tailed Tyrant** *Colonia colonus*

5 seen near the Oilbird cave, 1 between Oxapampa and Villa Rica, 2 at the Satipo ricefields

**Dusky-capped Flycatcher** *Myiarchus tuberculifer*

1 seen on the Satipo road

**Short-crested Flycatcher** *Myiarchus ferox*

1 seen near Tingo Maria

**Great Kiskadee** *Pitangus sulphuratus*

Fairly common at Villa Jennifer

**Boat-billed Flycatcher** *Megarynchus pitangua*

1 seen between Yurinaki and Satipo, 2 seen on the lower Satipo road

**Social Flycatcher** *Myiozetetes similis*

Fairly common in the lowlands

**Gray-capped Flycatcher** *Myiozetetes granadensis*

5 seen at the Oilbird cave and 5 at Villa Jennifer

**Lemon-browed Flycatcher** *Conopias cinchoneti*

1 seen in the Yanachaga-Chemillen NP, 5 seen on the Satipo road

**Golden-crowned Flycatcher** *Myiodynastes chrysocephalus*

5 seen in the Yanachaga-Chemillen NP, 5 seen on the Satipo road

**Streaked Flycatcher** *Myiodynastes maculatus*

1 seen at the Oilbird cave

**Piratic Flycatcher** *Legatus leucophaeus*

1 seen between Oxapampa and Villa Rica

**Tropical Kingbird** *Tyrannopsis melancholicus*

Common

**Barred Becard** *Pachyramphus versicolor*

2 seen at the Carpath tunnel, 2 seen on the Paty trail

**White-winged Becard** *Pachyramphus polychopterus*

2 seen between Villa Rica and Yurinaki

**Masked Tityra** *Tityra semifasciata*

1 seen at the Oilbird cave

**Purple Martin** *Progne subis*

1 female seen at Pantanos de Ventanilla

**Gray-breasted Martin** *Progne chalybea*

1 seen between Villa Rica and Oxapampa

**White-winged Swallow** *Tachycineta albiventer*

1 seen at the Oilbird cave and 25 in Río Perené

**White-rumped Swallow** *Tachycineta leucorrhoa*

1 seen flying south over Río Perené at Yurinaki by Leif only.

**Blue-and-white Swallow** *Pygochelidon cyanoleuca*

Common. One of two birds seen every day!

**Brown-bellied Swallow** *Notiochelidon murina*

Fairly common in the highlands

**White-banded Swallow** *Atticora fasciata*

Fairly common over lowland rivers

**Andean Swallow** *Haplochelidon andecola*

5 seen at Ondores, Junín

**Southern Rough-winged Swallow** *Stelgidopteryx ruficollis*

Common in the lowlands

**Barn Swallow** *Hirundo rustica*

2 seen at Río Perené

**Correndera Pipit** *Anthus correndera*

2 seen at lake Junín

**Short-billed Pipit** *Anthus furcatus*

10 seen at lake Junín

**Yellowish Pipit** *Anthus lutescens*

1 seen at Pantanos de Ventanilla

**White-capped Dipper** *Cinclus leucocephalus*

1 seen between Huanuco and La Quinua, 2+4 seen in the Yanachaga-Chemillen NP, 1+2 on the Satipo road,

1 seen in the upper Santa Eulalia valley

**Thrush-like Wren** *Campylorhynchus turdinus*

Heard at the Oilbird cave and at Villa Jennifer

**Gray-mantled Wren** *Odontorchilus branickii*

1 seen in the Yanachaga-Chemillen NP, 1 seen on the Satipo road

**Peruvian Wren** *Cinnycerthia peruana*

Fairly common at the Carpathian tunnel and Paty trail. Heard between Villa Rica and Oxapampa and 2 seen on the Satipo road

**'Mantaro' Wren** *Thryothorus sp nov*

Heard above Pucacocha and 3 seen and others heard between Andamarca and Satipo road

*Another new taxon found in the Andamarca area. Resembles Plain-tailed Wren.*

**Coraya Wren** *Thryothorus coraya*

Heard near Oxapampa, 2 seen near San Ramon

**Southern House Wren** *Troglodytes musculus*

Heard or seen all but three days

**Mountain Wren** *Troglodytes solstitialis*

Pairs seen most days at Paty trail, between Villa Rica and Oxapampa and on the Satipo road

**Sedge Wren** *Cistothorus platensis*

3 seen at Bosque Unchog

**Gray-breasted Wood-Wren** *Henicorhina leucophrys*

Commonly heard with a few seen in the subtropics

**Southern Nightingale-Wren** *Microcerculus marginatus*

Heard at the Oilbird cave and near Pozuzo

**Long-tailed Mockingbird** *Mimus longicaudatus*

Common along the coast and in the lower Santa Eulalia valley

**Andean Solitaire** *Myadestes ralloides*

Singles heard and seen mainly on Satipo road

**White-eared Solitaire** *Entomodestes leucotis*

3+3 seen on the Paty trail, 3 seen between Oxapampa and Villa Rica

*White-banded Swallow is always seen near rivers*

**Slaty-backed Nightingale-Thrush** *Catharus fuscater*

Heard on the Paty trail, between Villa Rica and Oxapampa and on Satipo road

**Pale-eyed Thrush** *Platycichla leucops*

3+5 heard and singles seen in the Yanachaga-Chemillen NP,

**Chiguanco Thrush** *Turdus chiguanco*

Common around Andamarca and in the Santa Eulalia valley

**Great Thrush** *Turdus fuscater*

Common in the highlands. Prefers more humid situations than Chiguanco Thrush.

**Glossy-black Thrush** *Turdus serranus*

1 seen and 1 heard on the Paty trail, 5 seen between Villa Rica and Oxapampa and 1 seen in the Yanachaga-Chemillen NP,

**Hauxwell's Thrush** *Turdus hauxwelli*

3 seen at the Oilbird cave

**Black-billed Thrush** *Turdus ignobilis*

Common in the lowlands

**Inca Jay** *Cyanocorax yncas*

Heard between Villa Rica and Oxapampa, 2+5 seen on the Satipo road

**Violaceous Jay** *Cyanocorax violaceus*

Common around Tingo Maria, 1 seen near Yurinaki, 2 seen near Satipo

**House Sparrow** *Passer domesticus*

Seen in several villages and cities

**Red-eyed Vireo** *Vireo olivaceus*

5 seen at the Oilbird cave, 5 seen at Villa Jennifer, 1 seen near Oxapampa, 5 seen at Mariposa, Satipo road

**Olivaceous Greenlet** *Hylophilus olivaceus*

1 seen and 1 heard at laguna Oconal, Villa Rica

**Rufous-browed Peppershrike** *Cyclarhis gujanensis*

1+2 seen around Mariposa, Satipo road

**Thick-billed Siskin** *Carduelis crassirostris*

25 seen at La Quinoa

**Hooded Siskin** *Carduelis magellanica*

Small groups seen in the dry highlands and Santa Eulalia valley

**Olivaceous Siskin** *Carduelis olivacea*

Singles seen in the east slope subtropics

**Yellow-rumped Siskin** *Carduelis uropygialis*

5 seen in the upper Santa Eulalia valley

**Tropical Parula** *Parula pitiayumi*

Singles seen and heard near Oxapampa and near Satipo

**Black-lored Yellowthroat** *Geothlypis aequinoctialis*

1 seen at Lomas de Lachay

**Slate-throated Whitestart** *Myioborus miniatus*

Singles in the lower subtropics

**Spectacled Whitestart** *Myioborus melanocephalus*

Common in the upper subtropics and the temperate zone

**Golden-bellied Warbler** *Basileuterus chrysogaster*

11 in total seen on the Satipo road

**Citrine Warbler** *Basileuterus luteoviridis*

Common in the temperate and subtropical zones

**Russet-crowned Warbler** *Basileuterus coronatus*

3 seen on the Paty trail, 2 heard on Satipo road

**Three-striped Warbler** *Basileuterus tristriatus*

Small groups in the Yanachaga-Chemillen NP and on Satipo road

**Buff-rumped Warbler** *Basileuterus fulvicauda*

3 seen at the Oilbird cave and 1 in the Yanachaga-Chemillen NP,

**Bananaquit** *Coereba flaveola*

1 seen at the Oilbird cave, 3 seen near Pozuzo

**Cinereous Conebill** *Conirostrum cinereum*

Fairly common along the coast and in the highlands

**White-browed Conebill** *Conirostrum ferrugineiventre*

3 seen at Bosque Unchog and 2 seen on the upper Satipo road

**Blue-backed Conebill** *Conirostrum sitticolor*

Fairly common in the temperate zone

**Capped Conebill** *Conirostrum albifrons*

2 seen on the Paty trail, 2+2 seen between Villa Rica and Oxapampa, 2+2 seen on Satipo road

**Giant Conebill** *Oreomanes fraseri*

1 seen at La Quinua

**Black-faced Tanager** *Schistochlamys melanopsis*

2 seen at laguna Oconal, Villa Rica, 1 seen near Mariposa on Satipo road and 1 seen at the Satipo ricefields

**Magpie Tanager** *Cissopis leveriana*

Fairly common in the lowlands and foothills

**Grass-green Tanager** *Chlorornis riefferii*

2 seen at the Carpish tunnel, 2 seen between Villa Rica and Oxapampa and 1 on the Satipo road

**Common Bush-Tanager** *Chlorospingus ophthalmicus*

10 seen on the Paty trail, common between Villa Rica and Oxapampa and 5 seen on Satipo road

**Yellow-throated Bush-Tanager** *Chlorospingus flavigularis*

10+5 seen in the Yanachaga-Chemillen NP, 5 seen on the Satipo road

**Gray-hooded Bush-Tanager** *Cnemoscopus rubrirostris*

2 seen between Villa Rica and Oxapampa, 2 seen on Satipo road

**Northern Black-capped Hemispingus** *Hemispingus atropileus*

2 seen at the Carpish tunnel, 1 seen on the Paty trail, 2 seen between Villa Rica and Oxapampa, 2+4 on the upper Satipo road

**White-bellied Hemispingus** *Hemispingus [superciliaris] leucogaster*

5 seen at the Carpish tunnel, 2 seen at the Paty trail, at least 7 seen on the upper Satipo road

**Oleaginous Hemispingus** *Hemispingus frontalis*

2 seen on the Paty trail

**Black-eared Hemispingus** *Hemispingus melanotis*

5 seen on the Paty trail, 2 seen between Villa Rica and Oxapampa, 2 seen on the Satipo road

**Rufous-browed Hemispingus** *Hemispingus rufosuperciliaris*

1 seen two days at Bosque Unchog

**Drab Hemispingus** *Hemispingus xanthophthalmus*

2 seen between Villa Rica and Oxapampa, 5 seen on the upper Satipo road

**Rufous-chested Tanager** *Thlypopsis ornata*

Fairly common in the highlands. 1 seen together with the Brown-flanked below Bosque Unchog

**Brown-flanked Tanager** *Thlypopsis pectoralis*

1 pair seen below Bosque Unchog

**Rust-and-yellow Tanager** *Thlypopsis ruficeps*

2+3 seen in the upper Andamarca valley

**Vermilion Tanager** *Calochaetes coccineus*

2 seen between Villa Rica and Oxapampa,

**Masked Crimson Tanager** *Ramphocelus nigrogularis*

4 seen at the Oilbird cave

**Huallaga Tanager** *Ramphocelus melanogaster*

2 seen at the Oilbird cave and 2 at Villa Jennifer

**Silver-beaked Tanager** *Ramphocelus carbo*

Common in the lowlands and foothills

**Blue-gray Tanager** *Thraupis episcopus*

Common in the lowlands and foothills

**Blue-capped Tanager** *Thraupis cyanocephala*

Fairly common in the subtropics

**Blue-and-yellow Tanager** *Thraupis bonariensis*

2 seen below Bosque Unchog, 2 seen in the Santa Eulalia valley

**Palm Tanager** *Thraupis palmarum*

Fairly common in the lowlands and foothills

**Hooded Mountain-Tanager** *Buthraupis montana*

1+4 seen on the Paty trail, 1 seen on the Satipo road

**Lacrimose Mountain-Tanager** *Anisognathus lacrymosus*

5 seen at the Carpish tunnel, 2+5 seen on the Paty trail, 2 seen on Satipo road

**Scarlet-bellied Mountain-Tanager** *Anisognathus igniventris*

Fairly common in the highlands

**Blue-winged Mountain-Tanager** *Anisognathus somptuosus*

2 seen on the Satipo road

**Yellow-throated Tanager** *Iridosornis analis*

7+1 seen on the Satipo road

**Golden-collared Tanager** *Iridosornis jelskii*

3+5 seen at Bosque Unchog

**Yellow-scarfed Tanager** *Iridosornis reinhardti*

2 seen on the Paty trail, 3+2 seen at Bosque Unchog, 1 seen on the Antenna road, Oxapampa

**Buff-breasted Mountain-Tanager** *Dubusia taeniata*

1 seen on the Paty trail, 1 seen at Bosque Unchog, 1 carrying food seen on Satipo road

**Chestnut-bellied Mountain-Tanager** *Delothraupis castaneiventris*

3 seen at the Carpish tunnel, 2 seen at Bosque Unchog, 2 seen on the upper Satipo road

**Fawn-breasted Tanager** *Pipraeidea melanonota*

2+1 seen between Villa Rica and Oxapampa, 1 seen near San Ramon

**Purple-throated Euphonia** *Euphonia chlorotica*

1 seen near Villa Rica and 10 along the Río Perené near Yurinaki

**Thick-billed Euphonia** *Euphonia laniirostris*

2 seen at the Oilbird cave, 10 seen near Yurinaki, singles on Satipo road

**Golden-rumped Euphonia** *Euphonia cyanocephala*

2 seen near Oxapampa

**Bronze-green Euphonia** *Euphonia mesochrysa*

2+2 seen in the Yanachaga-Chemillen NP

**White-lored Euphonia** *Euphonia chrysopasta*

1 seen between Yurinaki and Satipo

**Orange-bellied Euphonia** *Euphonia xanthogaster*

Singles in the Yanachaga-Chemillen NP and on Satipo road

**Rufous-bellied Euphonia** *Euphonia rufiventris*

1 male seen between Yurinaki and Satipo

**Orange-eared Tanager** *Chlorochrysa calliparaea*

2 seen in the Yanachaga-Chemillen NP, 1 seen on the Satipo road

**Turquoise Tanager** *Tangara mexicana*

1 seen at Villa Jennifer

**Paradise Tanager** *Tangara chilensis*

2 seen in the Yanachaga-Chemillen NP, 5 seen on Satipo road

**Green-and-gold Tanager** *Tangara schrankii*

1 seen in the Yanachaga-Chemillen NP

**Golden Tanager** *Tangara arthus*

2+2 seen in the Yanachaga-Chemillen NP

**Golden-eared Tanager** *Tangara chrysotis*

2+1 seen on the Satipo road

**Saffron-crowned Tanager** *Tangara xanthocephala*

3 seen on the Paty trail, singles seen on Satipo road

**Flame-faced Tanager** *Tangara parzudakii*

Singles in the subtropics

**Yellow-bellied Tanager** *Tangara xanthogastra*

3 seen on Satipo road

**Spotted Tanager** *Tangara punctata*

3 seen on Satipo road

**Bay-headed Tanager** *Tangara gyrola*

1 seen on Satipo road

**Golden-naped Tanager** *Tangara ruficervix*

1 seen in the Yanachaga-Chemillen NP and 2 seen between Oxapampa and Villa Rica

**Blue-browed Tanager** *Tangara cyanotis*

1 seen on Satipo road

**Blue-necked Tanager** *Tangara cyanicollis*

1 seen at the Oilbird cave, 4 seen between Pozuzo and Oxapampa, fairly common on the lower Satipo road

**Beryl-spangled Tanager** *Tangara nigroviridis*

Singles and pairs seen in the subtropics including two pairs with recently fledged juveniles

**Blue-and-black Tanager** *Tangara vassorii*

Fairly common in the upper subtropics and temperate zone

**Silver-backed Tanager** *Tangara viridicollis*

1+1 males seen on Satipo road

**Golden-collared Honeycreeper** *Iridophanes pulcherrima*

1 seen on Satipo road

**Black-faced Dacnis** *Dacnis lineata*

2 seen in the Yanachaga-Chemillen NP, 2 seen on Satipo road

**Blue Dacnis** *Dacnis cayana*

1 male seen on Satipo road

**Green Honeycreeper** *Chlorophanes spiza*

1 female seen on Satipo road

**Purple Honeycreeper** *Cyanerpes caeruleus*

2+2 seen in the Yanachaga-Chemillen NP

**Swallow-Tanager** *Tersina viridis*

1 seen near Pozuzo, 2 between Villa Rica and Yurinaki, 1+5 seen on Satipo road

**Plush-capped Finch** *Catamblyrhynchus diadema*

1 seen at the Carpish tunnel, 2 seen on the Paty trail, 3 seen on Satipo road

**Pardusco** *Nephelornis oneilli*

About 20 seen daily at Bosque Unchog

**Peruvian Sierra-Finch** *Phrygilus punensis*

Fairly common at La Quinua, Junín, Andamarca and upper Santa Eulalia valley

**Mourning Sierra-Finch** *Phrygilus fruticeti*

Very common in the Santa Eulalia valley

**Plumbeous Sierra-Finch** *Phrygilus unicolor*

Singles seen in the highlands

**Band-tailed Sierra-Finch** *Phrygilus alaudinus*

1 seen at Lomas de Lachay

**Ash-breasted Sierra-Finch** *Phrygilus plebejus*

Fairly common in the highlands

**White-winged Diuca-Finch** *Diuca speculifera*

About 20 seen at Ticlio and Milloc bogs

**Great Inca-Finch** *Incaspiza pulchra*

1+1 seen in the Santa Eulalia valley

**Rufous-backed Inca-Finch** *Incaspiza personata*

4 seen between Huanuco and La Quinua

**Collared Warbling-Finch** *Poospiza hispaniolensis*

10 seen at Lomas de Lachay, 5+5 seen in the Santa Eulalia valley

**Blue-black Grassquit** *Volatinia jacarina*

Fairly common in the lowlands

**Black-and-white Seedeater** *Sporophila luctuosa*

5 seen at the Satipo ricefields

**Yellow-bellied Seedeater** *Sporophila nigricollis*

Fairly common in the lowlands

**Chestnut-bellied Seedeater** *Sporophila castaneiventris*

25 at Mariposa, Satipo road with singles elsewhere in the lowlands

**Black-billed Seed-Finch** *Oryzoborus atrirostris*

1 male and 2 females seen at the Satipo ricefields

**Chestnut-bellied Seed-Finch** *Oryzoborus angolensis*

1 seen at the Oilbird cave, 1 seen at Villa Jennifer, 10 seen at the Satipo ricefields

*A record-shot of the Rufous-backed Inca-Finch*

**Band-tailed Seedeater** *Catamenia analis*

3 seen in the Santa Eulalia valley

**Plain-colored Seedeater** *Catamenia inornata*

5 seen below Bosque Unchog, 5 seen at Pocacocha

**Rusty Flowerpiercer** *Diglossa sittioides*

2+1 seen on the Satipo road

**White-sided Flowerpiercer** *Diglossa albilatera*

3 seen on the Satipo road

**Moustached Flowerpiercer** *Diglossa mystacalis*

Common at Bosque Unchog, Carpish tunnel and Paty trail.

2 seen on the upper Satipo road

**Black-throated Flowerpiercer** *Diglossa brunneiventris*

Fairly common at Unchog and from Huanuco to La Quinua, also on the upper Satipo road and Andamarca valley

**Masked Flowerpiercer** *Diglossa cyanea*

Fairly common in the subtropics

**Bright-rumped Yellow-Finch** *Sicalis uropygialis*

Common around lake Junín, 2 seen near Andamarca, common at the Milloc bog

**Greenish Yellow-Finch** *Sicalis olivascens*

15 seen in the Santa Eulalia valley

**Raimondi's Yellow-Finch** *Sicalis raimondii*

5 seen at Lomas de Lachay

**Tricolored Brush-Finch** *Atlapetes tricolor*

3 seen between Villa Rica and Oxapampa, 4+2 family groups seen on Satipo road

**Cloud-forest Brush-Finch** *Atlapetes latinuchus*

5 seen at the Carpish tunnel

**Slaty Brush-Finch** *Atlapetes schistaceus*

10 seen at the Carpish tunnel and singles at Unchog and Paty trail. 2+5 seen on the upper Satipo road

**Black-spectacled Brush-Finch** *Atlapetes melanopsis*

2+1 seen in the Andamarca valley

**Rusty-bellied Brush-Finch** *Atlapetes nationi*

Very common in the Santa Eulalia valley

**Stripe-headed Brush-Finch** *Buarremon torquatus*

3 seen at the Carpish tunnel, 1 seen on the Paty trail, 2 seen below Bosque Unchog, 3 seen on the upper Satipo road and 1 seen in the Andamarca valley

**Yellow-browed Sparrow** *Ammodramus aurifrons*

Common in the lowlands

**Rufous-collared Sparrow** *Zonotrichia capensis*

Seen all days!

**Grayish Saltator** *Saltator coerulescens*

Singles in the lowlands

**Buff-throated Saltator** *Saltator maximus*

Singles in the lowlands but also up in the subtropics

**Golden-billed Saltator** *Saltator aurantiirostris*

2 seen below Bosque Unchog, 1 between Huanuco and La Quinua, fairly common in the Andamarca valley

**Golden-bellied Grosbeak** *Pheucticus chrysogaster*

1 seen below Bosque Unchog, 1 between Huanuco and La Quinua, 1 between Junín and Villa Rica and 2+2 in the Santa Eulalia valley

**Black-backed Grosbeak** *Pheucticus aureoventris*

2 seen in the Andamarca Valley

**Yellow-hooded Blackbird** *Chrysomus icterocephalus*

2 seen at Pantanos de Ventanilla

**Peruvian Meadowlark** *Sturnella bellicosa*

Common at Lomas de Lachay

**Scrub Blackbird** *Dives warszewiczi*

Common in the Santa Eulalia valley

*Male Black-billed Seed-Finch at the Satipo rice-fields. Always a rare sight.*

**Shiny Cowbird** *Molothrus bonariensis*

1 seen near Pozuzo

**Giant Cowbird** *Molothrus oryzivora*

3 seen at Villa Jennifer, 3 seen near Yurinaki and 5 seen at the Satipo ricefields

**Moriche Oriole** *Icterus chryscephalus*

1 seen at Mariposa, Satipo road

**Orange-backed Troupial** *Icterus croconotus*

2 seen at Villa Jennifer

**Yellow-rumped Cacique** *Cacicus cela*

Common in the lowlands and foothills

**Solitary Cacique** *Cacicus solitarius*

3 seen on the Satipo road

**Crested Oropendola** *Psarocolius decumanus*

10 seen near Pozuzo

**Dusky-green Oropendola** *Psarocolius atrovirens*

Fairly common in the subtropics between Villa Rica and Oxapampa, the Antenna road and Satipo road

**Yellow-billed Oropendola** *Psarocolius [angustifrons] alfredi*

Common in the lowlands and foothills

*Also called Russet-backed Oropendola. The true lowland [sub]species has got all black bill.*
